The NACD Insurance Edge

Gaining the Ultimate Value-Added Advantage

AXON
— UNDERWRITING —

The NACD Insurance Program is designed to provide NACD Members with exclusive access to market-leading tools and programs that help manage risk, mitigate environmental losses, conduct loss control, and optimize emergency response.

PIER (Pollution Incident and Environmental Response)®
Policyholders have access to a nationwide network of pre-screened emergency response contractors, environmental specialists, or crisis management firms who respond in a timely manner to environmental incidents at pre-negotiated rates, thus helping insureds to minimize or mitigate losses associated with such incidents. Policyholders are automatically enrolled in this program.

Claims Expertise
AIG's environmental claims operation, with 80+ claims specialists, is the largest in the industry. The depth and breadth of our operation means we can devote expertise to environmental claims of all types. We have the right resources to help you respond to an incident.

RiskTool Advantage®
RiskTool Advantage® provides a unique web-based system that provides clients with access to training, best practices and more, to help improve risk management. The system provides the ability to implement company-wide training program for environmental, health and safety best practices, create customized training videos using a smartphone or iPad, or choose from a video library of over 100 titles, many available in languages other than English for employee training.

Transportation Loss Control
We provide a number of transportation-related loss control programs for insureds that reinforce positive driving behavior and potential improvements in loss reduction. These programs include driver monitoring and mock Department of Transportation audits.
